

TK DESIGNS

ORGANIZATION WEB SITES

These sites are samples of organization sites developed by TK Designs. Both of these sites were completely developed by TK Designs, including the purchase of web domains and hosting through the uploading and maintenance of the sites.

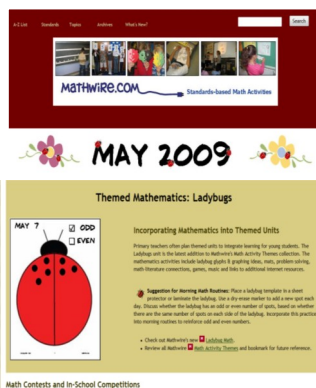

DANCING IN PARADISE WITH BILL AND VIOLET

This site was developed for Bill and Violet Ray, who choreograph and teach line dancing and hula. They dreamed of having a site that would showcase their original dances.

www.billandviolet.com

The site features stepsheets and YouTube videos for these original dances. Both Bill and Violet currently teach line dancing and hula so the site also includes calendars, dances and information for class members.

MATHWIRE

This site was developed for elementary math teachers. The site features math activities that meet the Math Standards and keep students actively involved in constructing important math concepts and skills.

Teachers love the site because all of the activities are available in PDF format, making it easy to browse and download files. A new Mathwire issue is posted monthly, but a Mathwire subscription service notifies subscribers when new content is uploaded to the site in between times.

www.mathwire.com

Archives and an internal site search feature enable users to easily locate activities and information.
